

Dr. Jay Lehr

Jay Lehr is an author, speaker, and futurist. He is currently the Science Director of the Heartland Institute, a libertarian think tank supported by contributions by individuals, foundations, and corporations. No corporation contributes more than 5% of its annual income. He is also Senior Scientist with Environmental Education Enterprises, Inc. in Ostrander Ohio.

In 2008 Dr. Jay Lehr was named Chief Hydro-geologist for Earth Water Global (EWG) Corporation, one of the largest providers of water supply projects throughout the world. EWG makes available for delivery previously overlooked, large scale sustainable ground water resources at EWG's financial risk under a long term services contract with government clients globally.

Jay has run companies from a dozen to 80 employees and sold two of his businesses to Fortune 500 companies (Times Mirror and Waste Management) and stayed on to run them for a period of time. He earned the highly regarded credential of Certified Association Executive while at the helm of a 25,000 member trade and professional society.

During the past several years, Dr. Lehr has served as a guest lecturer in the Departments of Economics at the University of Illinois, Purdue University, Southwest Missouri State University and Ball State University of Indiana.

Dr. Lehr has testified before Congress on more than three dozen occasions and consulted with nearly every agency of the federal government as well as many foreign countries on every continent. Lehr has 29 books in print. Amazingly, McGraw- Hill and John Wiley and Sons, America's largest science publishers have together published 10 of his books in the past 10 years including "The Handbook of Environmental Science Health and Technology."

He travels widely throughout North America speaking and consulting on Agri-Business in areas of Management, Leadership and Creativity. He spends considerable time with Corporate Boards of Directors helping them to better understand their responsibilities and how they can optimize their contribution to the organizations they serve.

Education

Dr. Jay Lehr received a Ph.D. in Ground Water Hydrology from the University of Arizona in 1962. This followed a degree in Geological Engineering from Princeton University, a brief stint with the US Geological Survey and 2 years with the US navy's Civil Engineering Corps. After graduate school, he taught at the University of Arizona and The Ohio State University before becoming the Executive Director of the National Ground Water Association and the Association for Ground Water Scientists and Engineers for 25 years.
